

## Untether your seating and reservation management with Guest List.

Don't inconvenience customers with bulky pagers. Guest List is a flexible, easy-to-use, cloud-powered tool for accurately managing table seating and online reservations—no booking fees or pagers required. Add value to your business and increase employee satisfaction while delivering a great customer experience.

-  Automate guest list management
-  Notify guests via SMS
-  Free online bookings

## Guest List

---

Guest List provides wait list, seating and online reservation management for a single, affordable monthly fee, with zero online booking fees.

### Key features

---

- “Table Ready!” is just a text or automated voice call away. Cloud-powered Guest List untethers your guests, employees and business from the inconvenience and cost of traditional guest list/reservation management solutions.
- Increase customer and employee satisfaction and convenience
  - Allow customers to continue their day while waiting for their table with cell phone notifications
  - Engage directly with customers during the reservation process
  - Easily make table reservations part of your restaurant’s website with no per reservation fees
  - Better coordinate restaurant operations with convenient, easy-to-use table visualization
  - Keep tables full with visual layouts of your restaurant, guest counts and server assignments
  - Easily split or combine tables in real-time with drag-n-drop icons
  - Flexible web page or downloadable app format works with any restaurant concept

### Benefits

---

- Efficiently manage a wait queue through webpage or smart app
- Immediately notify guests when seating is available by text and automated voice call
- Easily take reservations online through your own website with no reservation fees
- Maximize seating capacity by making seating changes in real-time using an intuitive visual floor plan
- Optimize table turn rates by managing tables, wait times, servers and reservations in real-time

### Compatibility

---
